Dr. P. R. Edwards  
Enteric Bacteriology Laboratory  
Box 185, Comm. Dis. Ctr., PHS  
Chamblee, Georgia

Dear Phil:

Dr. Nossal, who is working here this year, is making a very interesting application of the serotypic mosaic of Salmonellas in studying the specificity of the antibody response as exhibited by single cells. It would be very helpful and we would be grateful for the favor if you could furnish the following strains from your collection:

Salmonella habana  
Salmonella takoradi  
Salmonella sereban  
and Salmonella morehead.

With best wishes as ever,

Yours sincerely,

Joshua Lederberg  
Professor of Genetics
